

Senior Year Planning

LINDEN COMMUNITY SCHOOLS

BUILDING STRENGTH IN SPIRIT & INTEGRITY THROUGH EDUCATION

College does not necessarily mean attending a 2 or 4 year university.

There are a variety of apprenticeship, technical, and certificate programs that offer students great opportunities in careers that offer livable wages and opportunities for career growth.

MAT2® MICHIGAN ADVANCED TECHNICIAN TRAINING PROGRAM

MAT2®– the **Michigan Advanced Technician Training Program** – is an innovative, industry-driven approach to education. Developed in conjunction with global industry technology leaders to combine theory, practice and work to train a globally competitive workforce, MAT² addresses two critical issues facing the manufacturing and technology industries: a widening skills gap and an aging workforce. This initiative functions similar to an apprenticeship program, where students alternate between classroom instruction and on-the-job training, gaining the necessary hands-on skills and real-world experiences for them to become a successful and productive member of the workforce.

GOING PRO WITH SKILLED TRADES!

Skilled Trades are careers that often require less schooling and debt than a four-year degree. These jobs are in demand for fields like healthcare, information technology, advanced manufacturing, construction and automotive. Once seen exclusively as a world of manual labor, today's Skilled Trades jobs offer a wide array of opportunities for high school and community college students.

Employers in Michigan are now seeking talent to fill these roles more than ever before. With the skills you develop through professional trades careers, you can earn a great salary and benefits sooner than you imagined.
